PeriGen Announces the Acquisition of the Assets of LMS Medical Systems

Acquisition Unites Leading Risk-Reduction Technologies to Create the Most Comprehensive OB Clinical Decision Support Solution Available Globally

Princeton, NJ (July 27, 2009) – PeriGen, the only OB-specific risk reduction solution for hospitals generating immediate, quantifiable clinical and financial value, today announces the acquisition of the software and related assets of LMS Medical Systems (Canada) Ltd, the Montreal-based leading provider of maternal-fetal monitoring and interpretive technologies. Terms of the transaction are not being disclosed.

Currently contracted in 36 hospitals nationwide, PeriBirth™, PeriGen's advanced clinical decision support system, has supported more than 310,000 births and is built on more than 6,500 OB protocols, regulatory standards, and best practices. The PeriBirth solution provides clinicians assurance that the prescribed and recommended course of care is followed and documented. This results in the safest obstetrical care for mother and baby as well as financial benefits to the hospital – specifically a solution that pays for itself typically in less than 18-months.

“PeriGen’s acquisition unites two leaders in technology-driven OB-risk reduction solutions. By integrating LMS’s suite of advanced fetal strip monitoring and interpretative solutions with PeriBirth, PeriGen will provide hospitals with a comprehensive and unmatched OB decision support and documentation solution”, said Donald A. Deieso, Ph.D., PeriGen’s Chairman and CEO. “This uniquely powerful combination will provide the most advanced technology to help clinicians achieve the highest levels of patient safety while reducing risk and malpractice,” he added.

With this acquisition, PeriGen expands its reach into Canada and adds a number of patents and proprietary OB technologies which are cleared by the FDA, licensed by Health Canada, and bear the CE mark for Europe.

Page Two – PeriGen Acquires LMS Medical Systems Inc.

LMS Medical Systems, a pioneer in the development of real-time analysis of continuous maternal-fetal monitoring, was founded by obstetrician Emily Hamilton, MDCM, FRCSC, and Associate Professor of Obstetrics and Gynecology at McGill University. Dr. Hamilton will assume the role of Senior Vice President of Research for PeriGen.

“From the inception of our company, using technology to improve the safety of labor and delivery for mother and baby has been at the heart of what we do,” says Dr. Hamilton, “We’re proud and excited to be a part of PeriGen, an organization that shares our passion for advancing the quality of OB care and, thereby, helping to create optimal birth experiences and outcomes.

About PeriGen.

Formerly E&C Medical Intelligence, PeriGen is a technology-enabled professional services company specializing in risk reduction and clinical quality improvement in Obstetrics. Singularly focused on reducing risk and improving financial performance, PeriGen’s clinical decision support and fetal monitoring solutions are installed in over 100 hospitals across North America. A pioneer in clinical decision support, PeriGen provides innovative solutions and a full suite of complementary professional and consulting services that reduce risk and improve clinical outcomes. PeriGen is a US corporation headquartered in Princeton, New Jersey, with offices in Canada and Israel.

About LMS.

LMS is a leader in the application of advanced mathematical modeling and neural networks for medical use. The LMS CALM Suite provides clinical information systems and risk management tools designed to improve outcomes and patient care for mothers and their infants during childbirth.
